Welcome Note

With great pleasure and enthusiasm, I welcome you to the prestigious International Colloquium on "Translational AI: Engineering Solutions for Society." The Translational Research and Professional Leadership Centre, TPLC, and the Department of Information Technology, Government Engineering College Barton Hill, are jointly organising this event.

In today's rapidly evolving world, Artificial Intelligence (AI) is not just a field of academic research; it is a powerful tool that is transforming industries, improving lives, and addressing some of the most pressing challenges facing our global community. This conference brings together brilliant minds from academia, industry, and government, all focused on harnessing AI's potential to create practical, scalable, and sustainable solutions. The theme of Translational AI emphasizes the need for bridging theoretical advancements with real-world applications—where cutting-edge engineering meets tangible societal impact.

As an institution committed to fostering innovation and excellence, we are excited to explore how AI can revolutionize sectors like healthcare, agriculture, education, transportation, and beyond. With the collective expertise of our distinguished speakers and attendees, this conference aims to spark collaborations that will push the boundaries of what is possible.

I invite all participants to engage deeply in the discussions, share ideas, and embark on a journey of discovery. Together, let us create a future where AI empowers not only industries but also enhances the quality of life for individuals around the world.

Wishing you an insightful and enriching experience!

Warm regards,

Dr. Shiny G Principal, GECBH

Welcome to ICTER 2025

The third International Colloquium on Translational Engineering and Research, ICTER 2025, aims to provide a platform for professionals to present, discuss, and explore emerging trends in Artificial Intelligence from a multidisciplinary perspective. As a collaborative forum for experts from academia, industry, and research organizations, ICTER 2025 encourages exchanging ideas, experiences, and case studies to bridge the gap between research and practical applications across diverse engineering fields. The Translational Research and Professional Leadership Centre (TPLC) and the Department of IT, Government Engineering College Barton Hill jointly organise the colloquium.

Organising Institute

Government Engineering College, Barton Hill (GECBH), established in 1999, offers five full-time B.Tech. and eight full-time M.Tech. degree programs. It also provides a one-year Advanced Diploma in Automotive Mechatronics in collaboration with Mercedes Benz India. The institution has partnered with industry leaders like Mercedes Benz and BOSCH Ltd, academic institutions such as IIT Madras, and research organizations like VSSC and CDAC. Additionally, GECBH has signed MOUs with the ICT Academy to strengthen professional collaborations.

Organising Departments

The Translational Research and Professional **Leadership Centre (TPLC)** at Government Engineering College, Barton Hill, was established in 2015 through a Public-Private Partnership (PPP). It offers an AICTEapproved postgraduate program in Translational Engineering, affiliated with APJ Abdul Kalam Technological University. TPLC collaborates with government agencies, Integrated Rural Technology Centre, Smart City Trivandrum Limited, ANERT, ULTS, and NGOs such as Thanal and Druvansh and has facilitated the launch of four start-ups through its M.Tech. students. In addition, 23 students have undergone international internships and obtained global exposure as part of their curriculum.

The Department of Information Technology at Government Engineering College, Barton Thiruvananthapuram, established in 1999, accredited by the NBA and affiliated with the APJ Abdul Kalam Technological University. It offers a B.Tech. in Information Technology and two M.Tech. programs, one in Network Engineering and another in Artificial institutions like IITs, various government and semi- 🚓 Intelligence & Data Science. The department focuses on excellence in education and research in AI, machine learning, cyber security, and data analytics projects. It maintains strong industry ties for internships, industrial visits, expert lectures, supports student entrepreneurship, and encourages innovation and startups.

Collaborating Partners

- Agency for New and Renewable **Energy Research and Technology** (ANERT)
- Indian Institute of Technology Bombay
- Indian Institute of Technology Delhi
- Indian Institute of Technology Madras

- Smart City Thiruvananthapuram Limited (SCTL)
- Sree Chitra Tirunal Institute for Medical Sciences and Technology, Trivandrum
- **UL Technology Solutions** (ULTS)

AI Research Frontiers

The International Colloquium on Translational AI: Engineering Solutions for Society focuses on integrating AI with engineering to tackle real-world challenges. It gathers experts from academia, industry, and research to discuss AI-driven innovations in healthcare, sustainability, infrastructure, and more. The event emphasizes collaboration and knowledge exchange to advance sustainable AI applications in areas like circular economy, waste management, renewable energy, smart cities, agriculture, environmental conservation, education, and healthcare.
